Ts. Afiq Syazwan Razizad

CEng MIET

Manager, Facilities Management — Asset Integrity, PETRONAS

Professional Profile

Chartered Engineer and PETRONAS manager with 18 years across offshore operations, turnaround management, technical assurance, joint-venture commercial roles and upstream digital. Known for translating complex technical challenges into measurable business value through risk-based thinking, commercial discipline and cross-organisation leadership.

Career Highlights

- Delivered 23/23 planned turnarounds (100%) with 2.1M+ safe man-hours and zero incidents.
- Generated millions in savings via a Long-Term Diving Support Vessel sequencing strategy.
- Engineered a cross-PAC spare-engine sharing model (GE LM2500), avoiding capex.
- Authored OEMS 2.0 for Turnaround Management using LEAN methodology.
- Led the Dulang turnaround with 500+ personnel — on time, on budget, on scope.

Experience

Manager, Facilities Management

2019 — Present

Asset Integrity Management, POM · PETRONAS

Oversee multiple Petroleum Arrangement Contractors (PACs) and lead multidisciplinary teams delivering complex offshore facility projects — steering practices, approving budgets and driving technology adoption.

Project Manager — Upstream Digital

2018 — 2019

PETRONAS Carigali Sdn Bhd

Delivered multiple digital projects using Agile, embedding offshore operational expertise so solutions were practical for real production environments.

Joint Venture Management Executive

2016 — 2018

PETRONAS Carigali Sdn Bhd

Evaluated project economics and prepared sanction cases up to SVP level; managed PSC partner relationships to achieve consensus on high-value projects.

Technical Assurance Executive

2015 — 2016

Technical Global · PETRONAS Carigali

Led development of OEMS 2.0 for Turnaround Management across regions, applying LEAN to simplify processes and enhance governance nationwide.

Experience (continued)

Maintenance Supervisor — Offshore

2013 — 2015

Resak Gas Platform · PETRONAS Carigali

Enabled safe, efficient maintenance on a high-H2S gas platform; delivered the Resak Turnaround on time with zero incidents and cleared instrumentation backlog without impacting production.

Operations Engineer

2012 — 2013

Sepat FSO Project, Keppel Shipyard · PETRONAS Carigali

Operations representative for construction of a Floating Storage & Offloading unit; delivered first gas and first oil on schedule and embedded long-term operability into design.

Maintenance Engineer

2007 — 2012

Dulang Field · PETRONAS Carigali

Turnaround Coordinator for a major integrated offshore turnaround — aligned multiple contractors and disciplines; delivered a 500+ personnel turnaround on time, on budget, on scope.
